

VARO ENERGY ORCHESTRATES RAIL FLEET

CUSTOMER CHALLENGE

VARO rented around 1,500 railcars and all planning was manually done with no simple overview of the rail fleet.

- No electrical or visual control
- Waste of manpower because of unclear railcar arrival times
- No available metrics on how efficiently the fleet was managed
- Unclear maintenance schedules due to lack of oversight and tracking

Increased Efficiency

VARO ENERGY

Supplying fuel to customers is at the core of VARO's business; 24 hours a day, 365 days a year. VARO operates through integrated, flexible fuel value chains producing and marketing a wide variety of oil products via a network of integrated downstream assets located across Germany, Switzerland, France and Benelux.

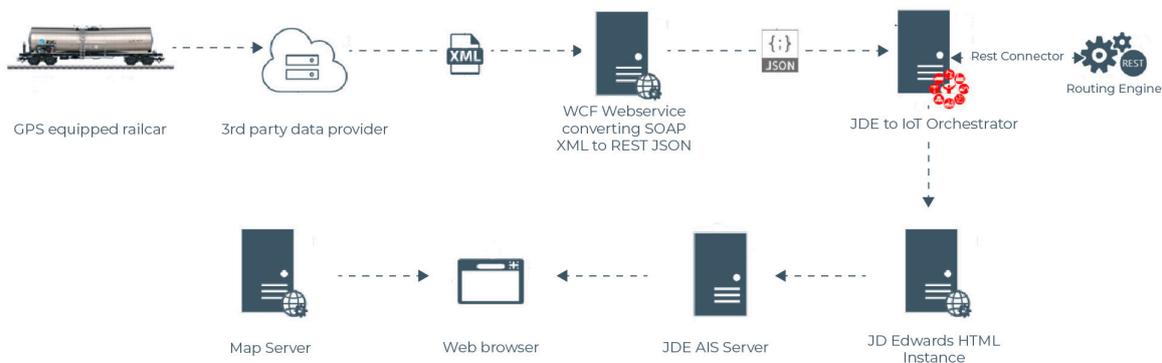

VARO is known for providing high quality oil products for everyday use through a reliable fuel depot infrastructure. To maintain this position in the market, a sophisticated digital solution was required to improve visibility and management of VARO's rail fleet, whilst ensuring the highest safety standards.

WHY VARO CHOSE REDFAIRE INTERNATIONAL

The team at VARO chose Redfaire International and their DACH region partner FSS due to their IoT experience and proven global solutions within the JD Edwards ecosystem.

VARO and the team collaborated together to design a sophisticated and robust solution for VARO's needs. This included extending the Equipment Master with railcard attributes, getting the GPS data of railcars from different rental railcar companies into JD Edwards, geofencing BSFN algorithm within JD Edwards, building UX OnePage with watchlist and map (Alert / Analysis / Act) and linking railcars to sales orders.

ARCHITECTURE

Results

- In-depth view of the whole fleet
- Current position can be directly viewed from the sales order
- Depots notified when railcars are approaching
- More effective and efficient use of resources

“Thank you for the huge effort you have put into making this go live better than anyone would have expected.”

Thomas Jetzer,
Logistics Manager at VARO Energy

About Redfaire International

Redfaire International marries the reach and scale of global entity, with the knowledge, insights and flexibility of local experts. You get one partner working under one methodology; managing your global projects, localizations and ongoing support.

When our clients succeed, we succeed so we apply this value to everything we do to deliver best-in-class consultancy projects and customer success.
