ORACLE
JD EDWARDS ENTERPRISEONE

Transformational Innovation, Choice, Industry Focus,
Low TCO

JD Edwards EnterpriseOne offers a powerful, fully-integrated ERP software suite that provides more choice of databases and deployment options, including on-premise, private cloud, public cloud or hybrid cloud for maximized flexibility and low TCO. With over 80 application modules, end-user reporting, and personalization capabilities, JD Edwards EnterpriseOne combines business value, standards-based technology, and deep industry functionality into a solution that will transform your business. In addition to an array of out-of-the-box mobile applications, JD Edwards EnterpriseOne leverages Oracle's Mobile Platform to accelerate business execution and provide a complete enterprise mobile solution from deploying to building and extending mobile applications.

Demonstrated Business Value

- Rapid time-to-value delivers faster ROI
- Low total cost of ownership (TCO) saves money
- Flexible personalization and configuration reduces initial and ongoing system costs
- Product scalability contributes to company growth
- Technology choices fit IT infrastructure, including Internet of Things (IoT)
- Integrations add new capabilities to best-in-class applications

Used in Many Industry Segments

Manufacturing and Distribution	Industrial Manufacturing (discrete and process), Automotive Suppliers, Medical Devices, Life Sciences, Pharma, Wholesale Distribution … *more*
Consumer Products	Consumer Packaged Goods (CPG), Durable Consumer Products, Apparel Management, Food and Beverage Producers (agribusiness) … *more*
Projects and Services	Engineering and Construction, Commercial Real Estate, Homebuilding, Services Contractors, Public, Government … *more*
Capital Asset Intensive	Mining, Natural Resources, Oil and Gas, Green Energy, Chemicals and Lubricants, Utilities … *more*

Diverse Customer Profile

- Growing businesses
- Larger start-ups and corporate spin-offs
- Multinationals with global operations
- Midsize and large enterprises
- Subsidiaries using another ERP package at corporate headquarters
- Businesses with low TCO
- Enterprises with a diverse products/services portfolio
- Organizations wanting to replace other tier one ERP packages
- Businesses looking for technology choices
- Enterprises requiring mobile ERP packages

Product Releases and Platform Choices *(always consult the latest MTR for specifics)*

Latest Releases	Apps 9.2 + Tools 9.2
Databases	Oracle • IBM DB2 • Microsoft SQL Server
Operating Systems	Oracle Solaris • Oracle Linux • Red Hat Enterprise Linux IBM i • IBM AIX • Microsoft Windows Server
Deployment	On premise • Cloud (includes Oracle Managed Cloud Services) • Hybrid
Devices	Desktop • Laptop • Tablet (Android and Apple iPad) • Smartphones (iOS, Android)
Middleware	Oracle Fusion Middleware • IBM WebSphere
Client Browser	Internet Explorer • Mozilla Firefox • Safari for Apple iPad • Google Chrome
Integration Standards	Service Oriented Architecture (SOA) techniques: SOAP (Simple Object Access Protocol), REST (Representational State Transfer), JDBC, and XML based

Key Differentiators Over Other ERP Packages

- All data resides in a single database, regardless of type of data.
- All financial transactions flow into one general ledger, regardless of activity or source.
- All project costs automatically roll into the general ledger, with rapid calculations for accurate earned value for each project.
- One general ledger is used for advanced cost accounting, fixed assets, labor, and expense management.
- A tier one ERP suite that is economical and comprehensive, focusing on manufacturing and distribution, consumer goods, project-based and asset-intensive industries.
- Built-in lifecycle and change management tools work across the entire system.
- Enhanced JD Edwards EnterpriseOne integration platform that improves co-existence with other applications, including Oracle Cloud applications.

- Supported localizations for core products require no additional installation.
- Options for complete and robust technology stacks and deployment.
- Complete SOA with extensive content and services.
- Independence between tools and application layers enables upgrade to tools prior to applications upgrade, allowing uptake of new technologies.
- Tools allow simultaneous proliferation of changes to application security, usability, and performance across all products.
- Built-in lifecycle and change management tools work across the entire system.
- Mixed-mode manufacturing: Discrete, Repetitive, Lean, and Process.
- IoT technology that captures and transmits data into JD Edwards applications for real-time action and analysis.
- Tools to enable citizen developers to create new business solutions that easily extend the JD Edwards EnterpriseOne platform.

Complementary Oracle Applications

- Oracle Agile – *Product life cycle management (PLM)*
- Oracle Transportation Management – *Advanced transportation management*
- Oracle HCM Cloud — *Talent management and compensation*
- Oracle Talent Cloud – *Recruitment*
- Oracle BI - *Business intelligence*

- Oracle Hyperion – *Advanced financial analytics and reporting*
- Oracle Primavera – *Advanced project and contract management*
- Oracle Sales Cloud – *Opportunity to cash integration*
- Oracle Value Chain Planning – *Comprehensive supply chain management*

ORACLE

Common Integrated Business Processes (popular examples)

- Acquire to Retire Assets
- Benefits to Payroll
- Cash to Invest
- Demand to Available
- Design to Build (Deploy)
- Install to Maintain
- Lead to Order
- Lease to Move Out
- Make to Deliver
- Opportunity to Order
- Order to Cash
- Order to Receive
- Plan to Demand
- Plan to Produce
- Procure to Pay
- Record to Measure
- Record to Record
- Recruit to Retire (Hire to Fire)
- Request to Resolve
- Source to Settle

Modules for Integrated Business Applications

- **Financial Management:** Financial Management (General Ledger, Accounts Payable, Accounts Receivable, Fixed Asset Accounting) • Advanced Cost Accounting • Expense Management • Oracle Hyperion • OBIA Financial Analytics
